

# Ideation Phase

## Brainstorm & Idea Prioritization Template

Date	19 September 2022
Team ID	PNT2022TMID40025
Project Name	Personal Assistance for Seniors Who Are Self-Reliant.
Maximum Marks	4 Marks

### Step-1: Team Gathering, Collaboration and Select the Problem Statement

Template

## Brainstorm & idea prioritization

 10 minutes to prepare  
 1 hour to collaborate  
 2-8 people recommended

[Share template feedback](#)

### Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

 10 minutes

A

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

C

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

1

### Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 minutes

Sometimes the elderly forget to take their medication at the appropriate time. They also forget which medication He or she should take at that time. It is also difficult for doctors and caregivers to monitor patients around the clock. This medicine reminder system was created to address this issue. A user (caretaker) app is created that allows him to set the desired time and medicine.

## Step-2: Brainstorm, Idea Listing and Grouping

### 2 Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

**Nishok Rajan P**

- In a hazard situation, to notify the patient's nurse or doctor
- Effectively reduce the heavy workload without adding more staff
- Patient information should be kept secure.
- Before the medication gets over, text Clinic.

**Karthikeyan B**

- Reminder makes it easier for people to take their medications on time.
- Nowadays, applications are simple to use, even for the elderly.
- The doctor can view the patient's medical history at any time.
- We can securely send our prescription to any part of the world.

**Saravana prakash S**

- Obtain access to the hospital information system
- SMS alerts are sent to the phone numbers of the caregivers.
- Announcement of medication taking on time
- stock availability alert

**Viswa Bharathi K**

- Android-based application
- look for doctor disease wise
- IBM Cloudant Database
- obtain the doctor's contact information if it is available

### 3 Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

**Mobile Application**

- SMS alerts are sent to the phone numbers of the caregivers.
- Before the medication gets over, text Clinic.
- SMS alerts are sent to the phone numbers of the caregivers.

**Detectors**

- In a hazard situation, to notify the patient's nurse or doctor
- stock availability alert

- Obtain access to the hospital information system
- IBM Cloudant Database
- Android-based application

**Services**

- Announcement of medication taking on time
- obtain the doctor's contact information if it is available
- Reminder makes it easier for people to take their medications on time.

## Step-3: Idea Prioritization

4

### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes
